Professional Summary

Passionate Computer Science student with strong command over Java (Core Java, Swing), Python (Pandas, NumPy), C/C++, HTML, and CSS. Skilled in building interactive desktop applications and performing data analysis using modern libraries. Experienced in writing clean, optimized code and implementing real-world solutions. Eager to apply both software development and data analytics skills in impactful projects

Education

National Institute Of Technology , Kurukshetra

2024 – Present

Master of Computer Applications

CGPA: 7.8

Holkar Science College, Indore

2020 –2023

Bachelor's in Computer Science

Percentage-75.5

SDM higher Secondary School ,Shridham

2018 – 2020

Matriculation and Senior Secondary

Projects

Expression Converter Application

Jan 2025 – May 2025

Java, Swing, JDBC, MySQL, Multithreading

- Developed a desktop application combining a secure user login system with an interactive expression converter.
- Designed the login module using Java Swing for the GUI and JDBC with MySQL for user authentication and credential management.
- Implemented the expression converter to perform real-time Infix, Prefix, and Postfix conversions using multithreading for smooth performance.

Waste Management & Recycling Analysis

Jan 2025 – May 2025

Python, pandas, NumPy, Matplotlib, Statistical Analysis

- Analyzed municipal solid waste data for 34 Indian cities, covering waste generation, recycling rates, disposal methods, and landfill capacity.
- Identified key trends, correlations, and inefficiencies in waste handling, highlighting over-capacity landfills and ineffective awareness campaigns.
- Performed statistical tests and visualized correlations between cost, recycling rates, municipal efficiency, and population density.
- Proposed actionable recommendations for sustainable urban waste management, improved governance, and resource-efficient strategies.

Technical Skills

Languages: Java, Python, C/C++, SQL , HTML/CSS

Frameworks: Swing, aws

Developer Tools: Git, VS Code, Visual Studio, Jupyter Notebook, Google Colab

Libraries: pandas, NumPy, Matplotlib, Seaborn, scikit-learn
